

Choosing the right wooden name badge

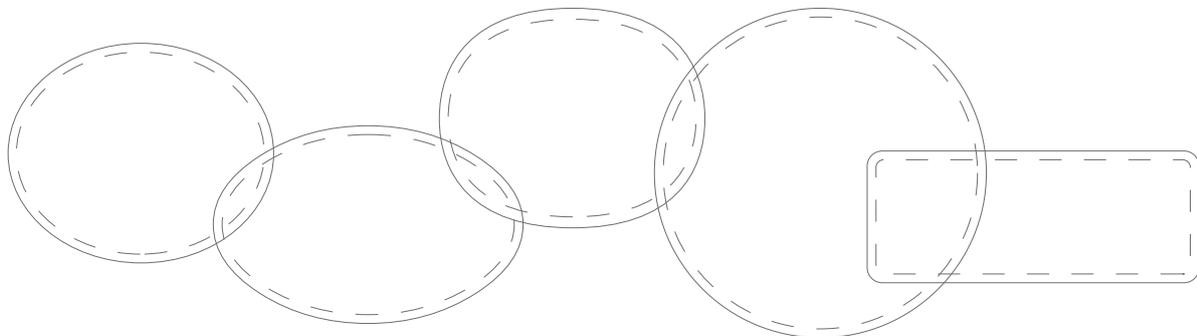

Select a finish

Choose from various wood dyes, or go with plain natural birch wood. Keep in mind that the product is real natural wood; there will be a lot of variations in the look and depth of color between each badge.

Choose a shape, or make one for yourself

We have plenty of ready-made shapes available in stock, ready for your custom-printed design. If none of those are to your liking, go ahead and create your own. We can assist you in designing a perfect shape.

Plain or three-dimensional

Once you know your color and shape, there's still one more option. Without engraving, the name badge has a flat, clean look. For those looking to add more oomph, We can finish your name badge by adding a little bit of depth. The engraved wood grain effect adds the third dimension.
